WEB PROJECTS

Logotham Live demo · GitHub

AI icon generator · Personal project

Next.js · TypeScript · Tailwind CSS · AI APIs

- Designed and deployed a web app generating custom icons with AI tools

CoupleTogether Live demo · GitHub

Shared scheduling web app · Personal project

Next.js · React · TypeScript · PostgreSQL · Drizzle ORM · Zod

- Built a shared calendar: recurring events, day / week duplication, responsive views
- Designed a REST API validated with Zod and a PostgreSQL schema versioned through migrations
- Implemented version checks to prevent concurrent-edit conflicts

ft_transcendence Video · GitHub

Real-time multiplayer Pong platform · 42 School

Next.js · React · WebSocket · PostgreSQL · Redis

- Built a full web application with real-time multiplayer matches over WebSocket
- Integrated authentication, user management, security and accessibility

Inception GitHub

Containerized web infrastructure · 42 School

Docker · Docker Compose · NGINX · MariaDB · Linux

- Deployed NGINX (TLS), WordPress and MariaDB in isolated containers, linked by a Docker network with persistent volumes

Minishell GitHub

Bash-inspired Unix shell · 42 School

C · Unix · Processes · Pipes · Signals

- Built a shell in C: parsing, pipes, redirections, heredoc, environment variables, fork / execve and signals

PROFESSIONAL EXPERIENCE

Game Developer — 6-month Internship

Adzap · video game startup · Paris Feb 2026 – Jul 2026

- Designed and built *ElectroFix Simulator*, a co-op game, **as the sole developer** — from design to **production release on Steam in 3 months**
- Implemented the **client-server** architecture and real-time network synchronization between players
- Owned the end-to-end release cycle: Git versioning, builds and publishing
